IT & DIGITAL LEARNING SUPPORT HANDBOOK

IT & Digital Learning Support

TECHNICAL DIRECTOR / SUPPORT LEAD

Make every digital classroom secure, stable and ready.

IT-01

PERSONAL MANDATE

PIONEER COHORT 2026

TECHNICAL OPERATIONS

Reliable online learning begins before students join

This handbook establishes the academy's operational standard for live-class technology, secure access, continuity and responsive user support.

PLATFORM RELIABILITY, ACCESS AND DATA PROTECTION

Make every digital classroom secure, stable and ready.

Academy context

Ashford and Gray Fusion Academy delivers 100% online live learning across ten certificate programmes. The pioneer induction is scheduled for Wednesday, 9 September 2026 from 7:00–9:00 p.m.; first classes begin Saturday, 12 September 2026 and the teaching period continues through 28 November 2026.

Certificate portfolio

PROGRAMMES	APPROVED TITLES
01–05	Housekeeping and Domestic Management; Hospitality Management; Events and Protocol Management; Executive Assistant Management; Hospitality and Global Relationship
06–10	Business Innovation & Entrepreneurship; Food & Beverage Management; Hospitality Workforce Management; Restaurant & Bar Service; Service Excellences

Course-title control: Diploma programmes are excluded. Use the corrected titles Hospitality Workforce Management and Service Excellences.

PERSONAL MANDATE

Platform Reliability, Access and Data Protection

Provide a dependable, secure and professionally supported digital learning environment for induction, live classes, executive activity and authorised academy records.

Core accountabilities

- Administer approved learning platforms, institutional accounts, meeting links and role-based permissions.
- Create and test virtual classroom links, host settings, waiting rooms, co-hosts, recording and attendance controls.
- Provide clear technical orientation and timely support to students, facilitators and authorised staff.
- Maintain tested backup internet, power, host, platform, presentation and file-recovery arrangements.
- Protect credentials, student information, recordings and academy data through need-based access and secure handling.
- Record incidents, response times, root causes, corrective actions and recurring technology risks.

Guardrails

- Do not grant access, release recordings or change official classroom settings without approved authority and a valid operational need.
- Do not disclose passwords, personal student data or confidential academy records through informal channels.

TECHNICAL SERVICE COMMITMENT

I will use my authority clearly, consult the right roles and remain accountable for evidence of completion.

DECISION RESPONSIBILITIES

Lead, consult and escalate correctly

Your role is strengthened when related portfolios know when you are leading, advising or escalating.

DECISION AREA	YOUR POSITION	KEY COLLABORATORS
Platform configuration and session controls	Lead within authority	Academic Affairs, Event Director
User access and permissions	Administer approved access	Registrar, responsible portfolio
Technical incident and continuity response	Lead operational recovery	Backup Host, Communications
Recording, storage and release	Control technology process	Communications, QCA, authorised owner

Decision discipline

- Define the exact decision and authority before discussion.
- Record the responsible owner, deadline and completion evidence.
- Communicate through one approved route.
- Escalate when legality, data, certification integrity, material finance or reputation may be affected.

DECISION STATEMENT

By [date], [owner] will complete [action] to [standard] and submit [evidence] to [reviewer].

PIONEER INDUCTION

Digital Classroom Orientation and Technical Control

Assigned participation: 6:30 p.m. production call; 7:32–7:44 p.m. live demonstration. Deliver a stable induction and show students exactly how to join, participate, access materials and recover from a connection failure.

Your distinctive contribution

- Demonstrate joining with the registered full name, mute/unmute, camera, chat, raise hand and authorised screen interaction.
- Show where approved class links, announcements and learning materials will be found.
- Explain primary internet, backup data, quiet-space and device-readiness expectations.
- State the official technical-support route and the controlled fallback process if the primary platform fails.

Live demonstration standard

- Join the production room by the assigned call time.
- Use the approved name, title, background and final presentation.
- Keep within the allocated time and avoid repeating another portfolio.
- Answer only within verified knowledge and your authority.
- Refer individual or confidential matters to the correct private support route.

INDUCTION OUTCOME

Students should leave with greater clarity, confidence and readiness for their first scheduled class.

PERSONAL SCORECARD

Five indicators of dependable IT service

Use these indicators to identify risk early, prioritise support and demonstrate reliable digital operations.

NO.	ROLE INDICATOR	STATUS / EVIDENCE
01	Scheduled classrooms and access links tested before use	
02	Platform availability and session start-time reliability	
03	Technical requests acknowledged and resolved within the agreed service window	
04	No unauthorised access, recording release or preventable credential exposure	
05	Incidents documented with corrective action and reduced recurrence	

Monthly reflection

- What improved because I acted?
- What remains dependent on another role?
- Which risk or contradiction needs executive attention?
- What evidence shows completion rather than activity?

PRIORITY PLAN

Your first 30-day technical operations focus

Use this sequence to convert induction readiness into controlled, dependable support for the pioneer cohort.

PRIORI TY	ACTION	OWNER / DATE / EVIDENCE
01	Confirm the academy's primary Zoom account, backup platform and authorised administrators.	
02	Complete the induction rehearsal and test sound, slides, recording, internet, power and backup host controls.	
03	Create the virtual-classroom readiness checklist and technical-support register.	
04	Verify first-class links, facilitator access and student joining guidance before 12 September 2026.	
05	Present the first technology reliability, incident and improvement report to the authorised academy lead.	

PRIORITY RULE

If a priority is delayed, record the reason, interim control, new deadline and person who must be informed.

WORKING TEMPLATE

Technology action and incident register

Maintain this page from the controlled support record and present material risks or recurring failures at the appropriate review.

REF.	DECISION / ACTION	COLLABORATOR	DUE	EVIDENCE / STATUS

Reporting standard

Report fact, decision, action, evidence and risk separately. An action closes only when the agreed evidence has been reviewed and accepted.

PERSONAL COMMITMENT

Make every digital classroom secure, stable and ready.

This acknowledgement may be adapted for the academy's final executive records.

IT & DIGITAL LEARNING SUPPORT

Technical Director / Support Lead | IT-01

I acknowledge the personal mandate, decision responsibilities, induction contribution and performance priorities assigned to my role. I will protect student dignity, academic integrity, institutional resources, accurate communication and the collective authority of the Executive Management Committee.

I will declare conflicts of interest, maintain confidentiality, use approved channels and remain accountable for every action assigned to me.

ASSIGNED OFFICER NAME	ROLE / CODE
	Technical Director / Support Lead / IT-01
SIGNATURE	DATE
CHAIR / SECRETARIAT CONFIRMATION	DATE

Technical service declaration

I will protect access, continuity, privacy and the integrity of every academy learning session.
